

Stoke-on-Trent Mathematics Excellence Partnership

Initial Teacher Training for mathematics

St. Joseph's College SCITT and The OAKS are at the forefront of the new school led system of Initial Teacher Training, School Direct for mathematics. This forms part of The Stoke-on-Trent Mathematics Excellence Partnership (MEP), an exciting local project gaining national attention for its ambition to train and retain specialist teachers and to 'fire up' pupils' enthusiasm for maths.

Using expert mentoring departments across all city secondary schools and academies, we are rolling out the Department for Education's vision for school centred initial teacher training.

Trainee teachers will gain excellent CPD from the best classroom practitioners who have demonstrated outstanding teaching and learning, and will be immersed in the daily life of the school.

Contact us for school experience to help boost your UCAS application!

Key features of our training include:

- Supportive subject and professional mentors
- Team teaching and collaborative planning opportunities
- Rigorous quality assurance
- Training sessions for both pedagogy and subject knowledge development
- Bespoke training plans
- Lesson observation and feedback
- Opportunities to share good practice with outstanding teachers across all subjects
- Experience of a range of school settings eg Primary, Special/PRU and Post-16
- The trainee will build a portfolio of quality evidence and reflection against the Teachers' Standards
- Participation in extra-curricular activities and the pastoral system

Support package for successful applicants!

- 2K relocation package to train to teach
- 2K incentive to complete your training year
- 9K tuition fees charged to MEP so in effect NO FEES!
- Further incentives of 2K for your NQT year, 2K for your 2nd year in teaching, and a 25K training bursary are available
